

Annex IV (f)
 Skills and Education Portfolio Guarantee Product
 - Specific provisions -
 (updated on 12 December 2023)

Background	The Skills and Education Portfolio Guarantee Product builds on the EFSI Skills and Education Guarantee Pilot, launched in 2020, dedicated to stimulating investment in education, training and skills.
EU Policy Objective	<p>Skills, education and training are part of the solution to get more people into the labour market and respond better to the economy's needs for skills.</p> <p>Insufficient financial resources are a major barrier to accessing education and training and leads to unequal opportunities for education. For young people, access to education in many EU countries relies too heavily on parental social background and financial standing. For SMEs, investment in the up-skilling or re-skilling of their employees is often constrained due to barriers preventing access to the finance required. Moreover, a massive investment in digital and “green” skills is needed to accommodate the shift towards a climate neutral Europe and digital transformation. Many will need to acquire new skills and move to new jobs in a different sector of economy. More will need to upskill to keep their job in a new work environment. For example, meeting the overarching adult learning participation target set in the Skills Agenda (at least 50% by 2025) would come at an estimated additional investment of EUR 48 billion annually. For this skills transformation to materialise, higher education providers and providers of services ancillary to education require an influx of financing to enhance and develop their offering.</p>
